Lunar Women

Breaking Barriers: Women, Science & History

Over a century ago, the physicist Hertha Ayrton declared: "I do not agree with sex being brought into science at all. The idea of 'woman and science' is completely irrelevant. Either a woman is a good scientist, or she is not." Her ideal vision of equality has still not been achieved, but putting women back into scientific history can help to explain modern attitudes.

- **Lunar Ladies** - Dr Kate Croft
- **Women & Enterprise in Georgian England** - Peter Collinge
- **Women & Science** - Dr Patricia Fara
- **Jane Austen: Pleasures & Pastimes** - Sarah Jane Downing
